TALLER SEMANAS 1 y 2. TERCER PERIODO

There are many reasons why we need to protect **our forests** ¹. They make the landscape beautiful and they are home to great biological diversity.

Forests contain 80% of all the world's biodiversity and are the natural hábitat of animals, plants and micro-organisms. In addition, this diversity provides **important natural resources** ² that sustain our lives by releasing oxygen, absorbing CO₂ preventing soil erosion, conserving water and moderating temperatures.

Sadly, the growth of the human population and our needs of housing, fuel, paper, food and many other things have a negative impact on the forests of the world. According to FAO¹, the world loses 13 million hectares of the forest **every year** ³.

We ⁴ need to support good practices that protect and restore forests by reducing the demand of paper, creating protected natural reserves, controlling agricultural development, and stopping ilegal mining and

logging. However the most powerful way to achieve all these solutions is **by educating people** 5.

We need to understand that the exploitation of forests can bring immediate benefits now, but it will destroy opportunities for future generations.
